

Flood Risk Management Local Plan Districts Dataset

1. Release Details

Version 2 of the SEPA Flood Risk Management (FRM) Local Plan Districts dataset was published on 22 December 2021. This dataset became available for use under [Open Government Licence](#) on 28 October 2022.

2. Dataset Description

Flood Risk Management Local Plan Districts (LPDs) are geographical areas that are designated for flood management under the Flood Risk Management Act (Scotland) 2009. These areas have been based on river catchments that can cross administrative and institutional boundaries, in some locations local edits have been made to ensure locations which are part of the same sewer catchment have not been split across LPDs. SEPA and responsible authorities use these areas for the co-ordination of flood risk management in Scotland and to develop ongoing partnership working.

There are 14 Local Plan Districts in Scotland. These locations are largely fixed, however are reviewed every 6 years to ensure they are still suitable.

3. Related datasets

Other datasets available that can also be used to understand the identification and co-ordination of flood risk management in Scotland's include:

- Potential Vulnerable Areas
- Flood Risk Management Target Areas

4. Data Attribution

Any use of this product must fully acknowledge the sources of the data. The following data attribution statements must be used:

© SEPA 2022; this SEPA product is licenced under the [Open Government Licence 3.0](#).

Some features of this information are based on digital spatial data licences from the UK Centre for Ecology and Hydrology ©UKCEH, contains Ordnance Survey Data ©Crown Copyright and Database Right 2007.

An attribution statement should be clearly visible where data from SEPA has been included in your work/product.

5. Data Usage Precautionary Note

The data provided within the FRM Local Plan Districts dataset reflects the information that we hold within our databases. Whilst we aim to avoid quality problems and provide datasets without errors, they may still exist. If issues are experienced whilst using the dataset, users are requested to [report](#) these to us so that they can be logged for consideration within a future version of the dataset.

6. Dataset Content

The metadata fields which can be found within the FRM Local Plan District dataset are described below in the detailed dataset schema.

Field Name	Description	Data Type	Field Length	Guidance
OBJECTID/FID	Internal Feature Number	Integer	-	Automatically generated number
LPD_ID	Unique identifier for the Local Plan district	Integer	-	Numerical identifier for the Local Plan District
LPD_NAME	Local Plan District Name	String	240	Text to describe the Local Plan District name
LEAD_LA	Lead Local Authority	String	80	Name of the local authority which leads coordination of activities in the LPD
DATE_DERIV	Date Derived	Date	8	Date dataset is valid from/supersedes any previous version
GEOGRAPHIC	Description of regional geography	String	240	Textual description of the geographical coverage of the Local Plan District
TOTAL_AREA	Total Area of LPD	Double	19	Automatically generated number for feature polygon
SHAPE	Feature Geometry	Geometry	-	Geometry type – Polygon, point etc
