

CS957 Research Methods: Research Proposal Assessment Marking Feedback

Student Name:	Ritesh Raju Ghorpade
Student Registration Number:	202559288
Project Title:	An Interactive Machine Learning and Decision Support Dashboard for Flood Risk Communication.

Markers: Students are required to demonstrate at least two of the expected competencies in each proposal section outlined below to achieve an overall pass for that section of the proposal.

Markers: Students need to pass at least five of the six proposal sections to pass the CS957 Research Methods assessment overall. Please select the relevant boxes in each section.

Markers: Please provide a maximum of three feedback comments for the student on their proposal.

Proposal Section	Expected Competencies	Demonstrated Yes / No
1. Introduction and Literature review:	Has the student clearly articulated the topic for their specific project ?	Yes
	Has the student demonstrated a thorough and critical understanding of literature relevant to their specific project ?	Yes
	Has the student effectively identified from the literature review research gaps which their specific project aims to address?	Yes
1. Section 1 overall outcome:		Pass ☒ X Fail ☐
2. Research aim, objectives and research questions	Has the student clearly articulated a research aim appropriate for their specific project ?	No
	Has the student clearly articulated research objectives appropriate for their specific project ?	Yes
	Has the student clearly articulated research questions relevant to and appropriate for their	Yes

	specific project?	
2. Section 2 overall outcome:		Pass ☒ X Fail ☐
3. Research methods	Has the student selected an appropriate research methodology to address the research objectives and research questions for their specific project?	Yes
	Has the student explained what methods are appropriate for them use and why to undertake their specific project?	Yes
	Has the student justified why the methods they have selected to undertake their research project are appropriate for their specific project?	Yes
	Has the student described and justified why the data analysis approaches they have selected are appropriate for their specific project?	Yes
3. Section 3 overall outcome:		Pass ☒ X Fail ☐
4. Research plan and deliverables	Has the student provided an appropriate timeline of activities via tabled time-plan or Gantt chart for their specific project?	Yes
	Has the student provided a risk analysis for successful completion of their specific project and have they described appropriate contingency plans?	Yes
	Has the student appropriately specified and addressed any ethical issues relating to their specific project?	Yes
	Has the student identified deliverables appropriate for their specific project?	Yes
4. Section 4 overall outcome:		Pass ☒ X Fail ☐
5. Referencing	Has the student demonstrated an ability to adhere to in-text citation reference best practices consistently for their chosen	Yes

	recognised referencing style?	
	Has the student included an appropriately organised and structured reference list relevant to their chosen recognised referencing style .	Yes
	Has the student included DOI numbers for each of the cited published journal papers / books / book chapters in their reference list?	Yes
5. Section 5 overall outcome:		Pass X Fail ☐
6. Overall presentation	Has the student submitted a well-organised proposal with a logical progression of ideas for their specific project?	Yes
	Has the student submitted a cover sheet that includes their information as appropriate: Research Project Title, Student Name, Student Registration Number, MSc Programme, Date of Submission, Word Count.	Yes
	Has the student submitted a proposal that meets the specified brief of 3000 words +/- 10% (Excluding the assessment front cover, contents page, figures, tables, diagram and reference list)?	Yes
6. Section 6 overall outcome:		Pass X Fail ☐
Overall assessment outcome (minimum 5 of out of 6 sections passed):		Pass X Fail ☐
Markers, please provide a maximum of 3 feedback comments to the student on their proposal:		
1. The aims are really objectives. The objectives are really milestones.		
2. Scope of the project feels challenging. You haven't put time for writing the ethics application within your plan. Recommend you write the dissertation as you go along. Don't leave starting until week 8.		

3. How will you work out what the recommendations should be?
Would help if your DOIs were clickable links.
